Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Election/Restrictions

Applicant's election without traverse of Invention 1, species 1, and claims 1-7 and 24-35 in the reply filed on 5/19/06 is acknowledged.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) The invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

Claims 1, 2, 4, and 5 are rejected under 35 U.S.C. 102(e) as being anticipated by United States Patent 6,811,560 B2 Jones et al.

Jones discloses the same invention comprising a radially expandable support structure 14 movable between a contracted navigation position and an expanded retention structure, an axially extending link 16, a patch comprising a wire support frame

Art Unit: 3738

20 and a polymer membrane 12 that when expanded is capable of moving to a position traverse the longitudinal axis of the device.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

(b) The invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 24-35 are rejected under 35 U.S.C. 102(b) as being anticipated by United States Patent 5,527,338 Purdy.

Purdy discloses the same invention comprising a tubular support member 102, at least one strut shown in figures 1-6, and a barrier 22, 112, 210 wherein the barrier is a polymeric membrane or a wire mesh transverse the longitudinal axis of the device shown in figures 1-12.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 3, 6, and 7 are rejected under 35 U.S.C. 103 as being unpatentable over Jones in view of United States Patent 6,652,555 B1 Van Tassel et al.

Art Unit: 3738

Jones discloses the invention substantially as claimed being described above. However, Jones does not disclose that the support member is made of Nitinol or that the membrane comprises ePTFE.

Van Tassel teaches the use of a ePTFE membrane linked to a support stent made of Nitinol in the same field of endeavor for the purpose of providing a biocompatible implant that with enhanced expansion and sealing abilities.

It would have been obvious to one having ordinary skill in the art at the time the invention was made to combine the materials taught by Van Tassel with the implant device of Jones in order to provide a implant that will fully expand and anchor itself upon insertion within the body.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Christopher D. Prone whose telephone number is (571) 272-6085. The examiner can normally be reached on Monday Through Fri 8:30 to 5:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Corrine McDermott can be reached on (571) 272-4754. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
